Summary

Results-driven **Software Engineer** with hands-on experience building and deploying **production-ready web applications and backend systems**. Strong background in **Java, Spring Boot, Python, FastAPI, JavaScript, SQL, and cloud platforms**. Creator of a full-stack **Weather Analytics platform** integrating multiple third-party APIs with async processing and persistent storage, deployed on **Microsoft Azure**. Experienced in system design, API integration, and cloud deployment, with growing expertise in **AWS** and **AI**. Proven collaborator with strong problem-solving skills and a passion for scalable software.

Projects

Weather Analytics Platform

[weatherdemo.online](#)
[WeatherAnalytics](#)

- Built a production-ready **FastAPI** backend with async **OpenWeather** integration, clean service-layer architecture, local YouTube weather/news videos, and SQLAlchemy-backed persistence.

“Sober Driver” Platform

[IlyasBaratov/DriverProject](#)

- Full-stack Java/Spring Boot app with authentication/authorization and PostgreSQL.
- Promotes safe driving through secure request/dispatch workflow.

Autonomous Arduino Robot

[ArduinoProject](#)

- Programmed a 4WD robot to navigate a labyrinth autonomously.
- Integrated motor control, sensors, and decision-making logic.

Experience

Event Planning Assistant Intern — Ashgabat International School (QSI)

Ashgabat, Turkmenistan
Mar 2022 – May 2022

- Supported logistics and scheduling for school events; coordinated with staff and vendors.
